

MOBILE PHONES ARE BOON OR BANE

Mobile phones are one of the most transformative innovation of the modern era. In my point of view I think mobile phones are a boon. It helps us in many ways:-

- We can anytime call, text or videocall anyone. It close the distance between people in different states, countries etc.
- It helps to learn many things through internet. We can easily access even students can attend online class and use educational apps.
- We can call for help to ambulances, police station, fire station incase of emergencies.
- People can attend meeting, check whatsapp, email, etc from wherever they are in this world through internet.
- We can read e-book, play games, messages, listen to songs, watch videos which gives us entertainment.
- Google maps help us to go to different places across the countries when we are lost or forgot the route that we have to go.

→ If we are not able to go to a place for shopping, or withdraw money to bank in emergencies cases we can only do it in online.

"Technology is best when it brings people together."
Matt Mullenweg.

Conclusion is that phones has become an important part of our lives without we knowlege. It helps us stay connected with the people around us, learn new thing, call in emergencies situations. ~~People can~~ Phones are not just gadgets it is a powerful tool that makes our life comfortable during harsh condition.

"The Phones are boon until it is used in a right ways and important things."
